in the Judicial, Police, and General (Archæological) Departments.*

No. $\frac{23}{12}$ (Miscellaneous) $\frac{1925 \text{ A.C.}}{1335 \text{ F.}}$

DATED, HYDERABAD (DECCAN), 2ND SEPTEMBER, 1926 A.C.
27TH MEHR, 1335 FASLI.

SUBJECT

**Review of the Report on the working of the Archæological Department
for the year 1334 F. (1924-25 A.C.)**

Personnel.—There has been no change in the *personnel* of the Department excepting during a short period (27th Baihman to 17th Urdibihisht) when Mr. Yazdani was on privilege leave and Mr. Ali Asghar Bilgrami, Registrar, Home Secretariat, held charge of the current work of the Department.

Tours.—Owing to the retrenchment in travelling expenditure, Mr. Yazdani was able to tour for seventeen days only and could not carry out the programme given in last year's Report

During the year Mr. Yazdani visited Ajanta and Ellora on the occasion of the visit to these places of Their Excellencies the Viceroy and Countess of Reading who expressed their appreciation of the work carried out by the Department. He also visited the so-called Buddhist *stupa* close to Alwampalli in the Mahbubnagar District.

Monuments Surveyed.—Two old buildings, one the Bāradarī of Tāramatī and the other the Mosque of Pema Matī along the Osman Sāgar Road in the suburbs of Hyderabad and a ruined tower, which Mr. Streenivas thought might be a Buddhist relic like the Negapatam Tower pulled down in 1867, and its near by remains close to Alwampalli, were surveyed. The description of the first two buildings is introduced with a happy touch of romance of the Quṭb Shāhis. The ruined tower at Alwampalli is considered by Mr. Yazdani to be the spire of a 10th to 12th centuries Hindu temple.

Conservation.—The group of Monuments at Golconda due to the excellent work of Mr. Ghulam Dastagir, Secretary to the Sarf-i-Khāṣṣ Committee, has been thoroughly cleaned and repaired. The incomplete tomb of Fāṭima Khānam, daughter of Sultān 'Abdu'lla Quṭb Shāh, has also been conserved. Mr. Dastagir has also set at rest doubts about the identification of the unfinished tomb near the gateway of Langer Bāgh, which had till now been taken to be that of Abu'l Hasan, the last of the Quṭb Shāhis.

In the Aurangabad District, the decayed roof of the gateway of Kailasa at Ellora, which was in a perilous condition, has been properly conserved as suggested by Sir John Marshall, by the insertion of a strong frame of steel joists supported on substantial pillars of ashlar masonry, and other measures taken to prevent the disintegration of the rock over the gateway.

A new road from the Rauza town to the Ellora caves has been constructed and opened on the occasion of the said Viceregal visit. The old Ghat Road above the caves has now been closed to vehicular traffic.

At Ajanta, the principal measures carried out during the year were:--

- (1) the cleaning and fixing of the frescoes in cave XVII,
- (2) the levelling of the fronts of several caves and the setting up of a pipe railing,
- (3) the construction of a metalled road from the Fardapur bungalow to the caves and
- (4) the completion of the P.W.D. road from Aurangabad to Ajanta.

As regards the proposed reproduction of the Ajanta frescoes by Colour Photography referred to in the last Report, the Department was corresponding with various expert firms in England and on the Continent; but in the meantime Sir John Marshall very kindly intimated that an expert colour-photographer engaged by the Government of India to reproduce the Central Asian frescoes acquired through Sir Aurel Stein, may, if we were so inclined, be asked to take some colour photographs of the Ajanta frescoes after fulfilling his engagement with the Government of India. The Department is awaiting the arrival of the expert to make the necessary experiment.

Among the Moslem monuments in the Aurangabad District, the Department has asked the Public Works Department to prepare an estimate for the thorough repair of the tomb of Rabi'a Daurani, which has suffered considerably in recent times for lack of proper supervision. An attempt is also being made to revive the beauty of the once splendid gardens belonging to this tomb.

In the Osmanabad District, repairs are being executed to the Dharasimha caves and the historic Dam in the Naldrug fort as well as the Pavalion, Pānī ka Mahall.

In the Medak District, the fort of that name has been conserved and a path laid out from the foot of the hill to the citadel.

Epigraphy.—Owing to the curtailment of its tour programme the Department has not been able to copy any new inscriptions. From materials collected during previous years, however, two monographs—one on the Canarese inscription at Nagai and the other on similar epigraphs from Patancheru will shortly be published.

In the field of Moslem Epigraphy Mr. Yazdani is editing an inscription found at Rajahmundry and brought to his notice by the Epigraphical Department of Southern India. The record throws considerable light on the conquest of Telingana by Ulugh Khān, who afterwards assumed the title of Muḥammad Tughlaq.

Numismatics.—1,273 coins have been acquired for the Cabinet of the Hyderabad Museum, of which 1196 are Treasure Trove, 35 purchased, 16 presented and 26 received in exchange of duplicates. The Treasure Trove consisted of 42 gold, 467 silver and 687 copper coins. A *mohur* of Jahāndār of the Muḥammadabad (Bidar) mint is unique: other rare *mohurs* are one of Aurangzeb of Nuṣratabād mint, one of Muḥammad Shāh of Aḥmadabād and one of Haidar

‘Alī of Bahādur Patan with his initial (ح). Among the silver coins acquired, are specimens of rare rupees of Aurangzeb of Mu‘azzamabad (Gorakhpur) and Maḥṣuṣabād (old Murshidabād), rupees of Shāh ‘Ālam I, and Shāh ‘Ālam II of Firozgarh (Yādgir) and rupees of Shāh ‘Ālam I, Farrukhsiyar, Muḥammad Shāh, ‘Ālamgīr II and Shāh ‘Ālam II of Firoznagar (Raichur).

Mr. Yazdani has found mention of the two latter mint towns in a contemporary *Statistical Account* (MS.) with their old and new names. Mr. Streenivas has carefully studied these coins and his scholarly notes on some of the rare coins are published with appendix A of Mr. Yazdani's Report.

Museum.—The modified scheme for the organisation of the Hyderabad Museum submitted by Mr. Yazdani as promised in his last year's Report will receive every favourable consideration.

Hyderabad Archaeological Society.—The Society which for the last few years has been in a state of suspended animation has been, it is pleasant to note, revived under the Presidentship of the Honourable Mr. W. P. Barton, C.S.I., C.I.E., and two meetings were held during the year.

Publications.—The Department has published the following books during the year:—

- (1) *Annual Report* for 1331-33 Fasli (1921-24 A.C.),
- (2) The Kotagiri Plates of the reign of Kakatiya Queen Rudramamba, being *Monograph No. 6 of the Hyderabad Archaeological Series*,
- (3) Bodhan Stone Inscription of the reign of Trailokyamalla being *Monograph No. 7 of the Hyderabad Archaeological Series*, and
- (4) *Guide to Ajanta Frescoes*.

In addition, the Director has edited Fasciculus 3 of the Shāhjahān Nāmāh for *Bibliotheca Series* of the Asiatic Society of Bengal and contributed three articles on the inscriptions of the N.W. Frontier Province, Rajputana and the Deccan to the *Epigraphia Indo-Moslemica*—the latter in his capacity as Epigraphist to the Government of India for Persian and Arabic Inscriptions.

Photographs.—109 new photographs were taken of which 44 relate to Ajanta and Ellora. To meet the great demand for the views of the latter the Department is arranging to bring out by next cold weather four colour reproductions and forty-four monotonies printed in postcard size. The Government realise the difficulties mentioned in the Report in the matter of meeting the growing demand for photographs of the views of these caves and will consider how they could be overcome.

Drawings.—Five architectural drawings were prepared and the complete outline of the *Visvantara Jataka* painted in Cave XVII at Ajanta was copied.

Expenditure on Conservation.—The expenditure on the conservation of monuments amounted to Rs. 46,971 approaching the normal expenditure of Rs. 50,000 originally fixed by the Finance Department, as against Rs. 29,225, the figures for the previous years.

Expenditure on the Maintenance of the Department.—The expenditure under this head amounted to Rs. 41,339-10-7 as against Rs. 39,510-13-4 in the previous year.

Conclusion.—The Government of His Exalted Highness the Nizam are pleased to note that the Department under the able guidance of Mr. Ghulam Yazdani is doing its best to conserve the Archæological remains of these Dominions and year after year efforts are made to trace and preserve important monuments.

No. 333

FROM

G. YAZDANI, ESQ., M.A.

Director of Archæology,

His Exalted Highness the Nizam's Dominions.

TO

THE SECRETARY TO GOVERNMENT,

Judicial, Police and General (Archæological) Departments.

Dated, Hyderabad (Deccan), the 15th June, 1926.

SIR,

I have the honour to submit herewith two copies of the Report on the working of the Archæological Department for the year 1334 Fasli (1924-25 A.C.).

The drawings and photographs illustrating the Report have been sent to the Surveyor General's Office, with the view of their making blocks from the same. They are, therefore, not included in the copies of the Report submitted herewith.

I have the honour to be,

SIR,

Your most obedient servant,

G. YAZDANI,

Director of Archæology.

Annual Report of the Archæological Department, Hyderabad

for

1334 F. (1924-25 A.C.)

There was no change in the staff of the Department during the year under **Personnel** review, excepting the short period (27th Bahman to 17th Urdibihisht), when I was on privilege leave and Mr. Ali Asghar Bilgrami, Registrar, Home Office, was in charge of the current work of the Department.

The programme of tour, submitted to Government in the last year's Report, **Tours** owing to inadequacy of the sanctioned travelling grant, could not be carried out. Until 1331 F., the touring charges not being limited to the Budget provision, we did not feel the insufficiency of our annual grant of O. S. Rs. 2,000, which was often exceeded by our expenditure under this head. In 1332 F. the Departmentalization Scheme put a stop to our going beyond the Budget provision under any head, but I was then on deputation in Europe and could not represent to Government that fixing the travelling grant rigidly to Rs. 2,000, which had proved inadequate by previous experience, would affect the activities of the Department. After my return from Europe I was contemplating to address Government on the subject, when a Farmān (dated 26th Jumādi'ul-Awwal 1343 H.) regarding general retrenchment in travelling expenditure was issued and under it our provision in the Budget was reduced to Rs. 1,000 per annum. The result of this reduction has been that during the year under review I have been able to tour for seventeen days only, a period which is absolutely disproportionate to the amount of conservation and survey work which should be carried on in the Dominions. The matter has been represented to Government and I hope, in view of the requirements of the Department, our grant for travelling expenses will be fixed at Rs. 3,000 per annum at least.¹

The tours carried out during the year embraced visits to Ajanta and Ellora, on the occasion of Their Excellencies the Viceroy and Countess of Reading going over there. The distinguished visitors greatly eulogised the enlightened policy of His Exalted Highness in preserving the unique paintings and antiquities of

¹ Since writing this the Special Committee for Retrenchment has accepted our representation and decided to recommend a grant of Rs. 3,000 per annum for our travelling expenses.

Ajanta and Ellora and showed their eminent satisfaction at the work done by the Department in these places.

I was also able to pay a flying visit to Alwampalli the site of the so-called Buddhist *stupa* in the Mahbūbnagar District. The result of my inspection is described elsewhere in this Report, and the details of my tours are given in my diary published herewith as Appendix B.

**Monuments
Surveyed**

In the suburbs of Hyderabad, along the Osman Sagar Road two old buildings are to be noticed, one styled the Bāradarī of Tāra Matī and the other the Mosque of Pema Matī. Contemporary writers have refrained from describing the incidents relating to the romantic lives of the Hindu consorts of the Quṭb Shāhī kings; but in Hyderabad many an anecdote is prevalent to this day and we often hear how Muḥammad Qulī Quṭb Shāh—the fifth king of the dynasty—paid secret visits to his lady-love, the sweet Bhāg Matī and how one night owing to the river Mūsī having overflowed its banks the king's return was delayed and his nocturnal enterprise exposed. The foundation of the city of Hyderabad is associated with the name of this lady and whatever may be the real facts, the old name of the town Bhāgnagar still survives and affords sufficient proof of the king's devotion to his Hindu mistress. Another memorial of the love homage of the Quṭb Shāhī kings to their Hindu wives is the little tomb of Pema Matī situated among the beautiful group of their mausolea at Golconda. The love story of this woman is told in an immortal line carved over the grave:—

بود از ازل گل جنتی پیم متی
۱۰۷۳ھ

“Pema Matī was verily a rose of Paradise from Eternity.”

The line according to the *Abjad* system gives the date 1073 (1662 A.C.) and thus preserves to us an exact record of the demise of the lady.

The buildings along the Osman Sagar Road which I shall describe here possess no inscriptions, but the tradition about their connection with the two Hindu ladies of the Quṭb Shāhī harem, Tāra Matī and Pema Matī, is perhaps as old as the buildings themselves and should not be cast aside for lack of contemporary literary evidence. The building on the north side of the road is the Mosque associated with the name of Pema Matī. It has a very fine situation, built on a rock in the middle of a cup-like valley on the borders of which low ranges of grey hills meet the horizon. The visitor approaches the building by a sloping path which seems to have been originally built for bullock carts carrying heavy blocks of masonry for the construction of the Mosque. On ascending we first notice a terrace, the base of which is adorned with arches on each side. The terrace is almost square in plan and measures nearly 143 feet each way at the top. The mosque is built on the western end of the terrace and comprises a double hall which is flanked with a semi-decagonal minaret on each side (towards North and South). The architecture of the building is characterized by a simple air of dignity which at once impresses the visitor. The hall towards the East has a screen of five arches supported on neatly carved piers, the salient feature of which is a band of mouldings at the top of the piers in the fashion of a frizzle

and looking extremely beautiful. This device is quite common in Medieval Hindu architecture and we notice it on the stylobates and pilasters of the temples at Ramappa, Aundha and other places. The carvings of the *chhajja* are again reminiscent of Hindu workmanship for the knobs of the brackets and the mouldings of the intervening fringe are typical of that class of work (Plate IIIa). The architect has shown his special fondness for using large blocks of masonry in facing the building, to wit, he uses a single block for facing each side of the piers while for the arches although he has used a pair yet they are so neatly joined in the middle that they look almost like a single block.

The roof of the hall consists of ten flat domes which lie buried in its thickness and so do not appear above it. The piers and arches supporting the roof are quite lofty and we get an impression of the interior of the Gothic cathedrals especially by the cluster of circular flutings round the pillars (Plate IIIb). The height of the building from the *chhajja* stones to the pavement of the terrace is 38 feet.

The Mihrab (the prayer-niche) is built in the middle of the west wall of the hall and consists of a rectangular room (in the form of an ante-chamber) with a semi-quadri-decagonal prolongation at its western end. The ceiling of the rectangular room is flat, while that of the prolongation is vaulted and its walls are decorated with a series of incised arches of plaster work.

On coming out of the hall when we cast a glance at the entire building it carries a look of incompleteness about it, which is owing to the absence of kiosks above the *Minars*, the lack of the usual carved parapet above the *chhajja*, and the absence of a suitable approach to the building. Pema Matī died in 1073 H. (1662 A.C.) in the 36th year of ‘Abdu’llah Quṭb Shāh’s reign (1626–72 A.C.) and the mosque which she apparently began during the closing days of her life was not completed owing to her demise.

A set of photographs and a plan (Plates III and V) published with this Report will give the reader a definite idea of the arrangement and architecture of the building.

The Bāradarī of Tāra Matī is situated on the left side (South) of the road and, although its architecture is not so impressive as that of the Mosque, yet it is an interesting structure. A flight of forty-five steps takes the visitor to the first terrace measuring 102 ft. by 54 ft.) which serves the purpose of a spacious landing. Another flight of twelve steps leads to the second terrace, which is a little smaller than the first and measures 89 ft. by 39 ft. The third or the main terrace rises twelve steps still higher and measures 142 ft. by 138 ft. The base of the main terrace is adorned with nine arches towards the North side and a number of cells are built at the back of the arches. The Bāradarī stands in the middle of the terrace, the plinth rising to a height of 4 ft. 6 inches above the terrace and the side screens measuring 63 ft. in each direction. The plan of the building consists of an arched corridor (14 ft. 7 inches) running round a square hall (25 ft. each way) which is built in the middle. The corridor has five arched openings on each side, the two extreme ones and the central one being slightly larger than the two intermediate ones. The ceiling consists of a series of vaults

which are buried in the thickness of the roof and do not appear on the top. The dome of the central hall is extremely flat and measures 24 ft. diametrically. The height of the building up to the cornice is 18 ft. 2 in., and above the cornice an arched parapet rises 4 ft. 6 in. higher.

The plinth of the Bāradarī is faced with polished masonry but the superstructure is covered with lime plaster which weather-beaten has decayed in some places. The building presents a picturesque appearance from the road—the ranges of arcades built one above the other form a pleasing feature. Visitors to Hyderabad are invited to view the Golconda Fort and Tombs from the roof of this building at sunset, when the pale light gives a wonderful colour effect to the vast panorama of otherwise grey walls and weather-stained domes and towers.

Another monument surveyed during the year under review is an old tower at Alwampalli in the district of Mahbūbnagar. Mr. Sayed 'Ata Husain, Superintending Engineer, Western Circle, had noticed the tower previously and sent the following report to my office :—

“During my inspection of Jedcherla-Devarkonda road, I noticed that in mile fifth from Jedcherla, on the right hand side of the road, there are remains of Buddhist temples in the shape of mounds over an extensive area near the village of Alwampalli and a wall of one of them is still standing.”¹

On receipt of the report Mr. T. Streenivas was deputed to visit the place and he made a preliminary survey of the monument in Āban, 32 F. (September, 1923). The tower, ruined as it is, appeared more or less like a Buddhist construction to Mr. Streenivas, who thought it might be another structure like the tower of Negapattam, which was pulled down in 1867.² Mr. Streenivas was however not sure of his identification of the style of the building, and the matter was brought to my notice on my return from Europe. I visited the place on the 13th Bāhman (16th December, 1924) and found that the ruined tower was the *sikhara* (spire) of a 10th to 12th centuries Hindu Temple. The stucco plaster, with which it was originally covered, has almost entirely peeled off and only slight traces of it can be noticed. The brickwork however is not damaged to any great extent and, by the arrangement of niches and pilasters on the walls of the tower, I had no difficulty in determining its character. As a matter of fact in the southern side of the tower I noticed a Hindu male deity squatting in a niche just in the same style as are some Hindu images in the well-known temple of Aundha in the District of Parbhani.³ The construction and the general form of the tower bear a striking resemblance to those of the spire of the temple of Palampet.⁴ Both are built of large bricks which are extremely light in consideration of their size.

The lower part of the tower has a square chamber which originally would have served the purpose of the cella or shrine. The *mandap* in front of the shrine does not exist now, but its site is marked by a mound of débris. There are several other mounds in the close vicinity, being probably the sites of similar other temples, and there is also an old tank which, although much silted up now,

¹ Vide D.O. No. 2304, dated the 3rd Isādar, 1332 Fash.

² Fergusson's *History of India and Eastern Architecture*, Vol. I, pp. 206-7

³ Cf. *Annual Report of the Department for 1916-17*, Plate VI.

⁴ *Ibid.* for 1915-16, Plate VI.

at one time must have been very large.

On one of these mounds, situated to the west of the old spire, some sculptures are to be seen, one representing a male deity in a swing, probably Krishna, (Plate VI, *Annual Report*, 1331-33 F.). There are also representations of human feet but carved on a brobdingnagian scale. The sculptures are not of a high order, and on account of their lying long in the open the stone is abraded considerably.

In the domain of conservation, taking the Hyderabad monuments first, **Conservation** I shall mention the excellent work done by Mr. Ghulam Dastagir, the able Secretary to the Şarf-i-Khāṣṣ Committee in cleaning and repairing the group of monuments at Golconda. The crypt of Muḥammad Qulī Qutb Shāh's (1580-1612) tomb, which was closed to the public from some time back owing to accumulation of dirt, has been re-opened now. The interior has been thoroughly tidied up and considerable repairs have been done to the vaulting. The mortuary bath in front of this building is also being repaired and during the year under review the central apartment and the hot and cold water chambers have been properly conserved. A plan of the Bath is included in the Department's *Report* for 1920-21 A.D. (Plate VIII).

Mr. Ghulam Dastagir has also conserved the incomplete tomb of Fāṭima Khānam, a daughter of Sulṭān 'Abdu'llah Qutb Shāh (1626-72),¹ but Mr. Dastagir's greatest achievement is the clearing up of the mystery about the identification of an unfinished tomb near the gateway of the Langar Bāgh, which through the fancy of some poet-historian of modern times had been associated with the name of Abu'l Ḥasan, the last monarch of the dynasty. The interior of the tomb was filled up with a large mass of débris on removing which Mr. Dastagir has discovered two graves—one at the centre of the hall and the other near the western end of it. The sarcophagi of these graves are of polished black stone, bearing quotations from the Holy Qur'ān, which are exquisitely carved.² The inscription on the central grave includes an epitaph which reads thus:—

Text.

میرزا نظام الدین
احمد نور موفده در
تاریخ ۲۶ شہر صفر
روز شنبہ سنہ ۱۰۸۵
بعد از سد بہر چہار
گہری نوحہت پیوستند ۵

¹ For a description of the tomb see *Epigraphia Indica Islamica*, 1915-16, p. 40.

² The texts carved on the central grave are:—

Top slab: Names of Allah, Muḥammad and 'Alī, Qur'ān (III, 16) and the epitaph.

Band I: Throne verse (Qur'ān, II, 256).

Band II: Qur'ān (II, 286).

Band III: Qur'ān (XCVII, CIX and CXII-CXIV)

Band IV: Nāḥi 'Alī and the Ḥute Du'aa.

Translation.

“Mirza Nizāmu'd Dīn Ahmad—may God illumine his grave! joined (the Realm of Divine) Mercy on Saturday the 26th Šafar, 1085 H. (22nd May, 1674) after three *Pahrs* and four *Gharīs* had passed (4-18 P.M.).¹

The grave of Nizāmu'd Dīn, being built at the centre of the sepulchral hall and bearing the date 1085 H., when Abu'l Ḥasan was in the prime of his youth, and only two years had passed since his accession, dispels the view that this tomb was built by Abu'l Ḥasan for himself and that he could not complete it on account of the abrupt ending of his reign. Mirza Nizāmu'd Dīn Ahmad, who in contemporary history appears under the shortened name of Sayyid Ahmad, was the son-in-law of 'Abdu'llah Quṭb Shāh and a nephew of Shāh 'Abbās II of Persia, from his sister's side.² After the death of 'Abdu'llah Quṭb Shāh, who left behind him no male issue, a war of succession ensued between the two sons-in-law of the late king, i.e. Mirza Nizāmu'd Dīn and Abu'l Ḥasan; but, as the former was not popular among the Court party, Abu'l Ḥasan was placed on the throne. Mirza Nizāmu'd Dīn died shortly after this event and it is not unlikely that Abu'l Ḥasan was instrumental in accelerating the death of his rival. The tomb of Fatima Khānam, a daughter of 'Abdu'llah Quṭb Shāh, as alluded to above, is also incomplete and as it is situated close to the tomb of Mirza Nizāmu'd Dīn, it may be inferred that the lady was most probably the wife of the latter.

We are thankful to Mr. Ghulam Dastagir for his correcting the popular view about the identification of the tomb and hope under his active superintendence similar other discoveries will be made. We also hope that the measures recently suggested by the Department regarding the repairs of the finials of the Quṭb Shāhī tombs, and the steps of the Bālā Hīṣār will be duly attended to and the shameful practice of scribbling names with charcoal on walls will be stopped. Notice-boards with clear instructions should be fixed on each building and any infringement of the instructions should be severely dealt with. The walls of the Bārādārī and some of the tombs present an appalling display of these scribbles which should be thoroughly removed. Another matter in which the Department has drawn the attention of the Šarf-i-Khāṣṣ Committee is the use of the Tombs in the Langar Bāgh for dwelling purposes. The majority of the dwellers often do not possess a sufficiently developed sense of cleanliness, and the walls and the interiors of the tombs therefore suffer at their hands—the stains of smoke, *pan* and other disfiguring material being not an uncommon sight. The gardens and the courts of the tombs may remain open to pic-nics and similar functions, but the practice of dwelling in the tombs themselves should be stopped, for apart from artistic considerations the interior of a sepulchre is to be respected on religious grounds as well.

Another monument conserved in the suburbs of Hyderabad during the

¹ A *gharī* is of 24 minutes' duration and a *pahr* of 3 hours'. Calculating 5-42 A.M., as the time of sun-rise on the 22nd May the passing of three *pahrs* (3 × 3 hours) and four *gharīs* (24 × 4 minutes) gives us the time 4-18 P.M.

² Vide *Hadiqat ul 'Alam* (Hyderabad lithograph), pp. 35-53, *Sarir-i-Azād* (Hyderabad ed.), pp. 286-88 and *Subh-i-ut ul Mar'at*, pp. 82-6.

year under review is the Toli Masjid to which reference has already been made in the previous *Reports* of the Department.¹ A sum of Rs. 4,480 has been spent on building a compound wall to the Mosque which has been thought necessary in order to protect the monument from the depredations of stray animals. The above sum brings the total expenditure hitherto incurred on the repairs of the building to Rs. 8,854.²

Passing on to the Aurangabad District mention should be made of the work carried out at Ellora. Sir John Marshall, a few years ago had remarked that the upper story of the gateway of the Kailasa being in a perilous condition, numerous stone piers and steel joists would have to be inserted to support the decayed roof. His advice in the matter has been fully availed of and a strong frame work of steel joists supported on substantial pillars of ashlar masonry have been inserted under the roof. Further to stop the disintegration of the rock on the top of the gateway all cracks and fissures appearing in the rock have been carefully filled up with cement thus making the whole a compact and rigid mass against atmospheric conditions. Piers of ashlar masonry have been built to support the decayed rock in several other places in the Kailasa and the total expenditure on the conservation at Ellora amounts to Rs. 10,400 during the year under review.

In describing the measures carried out at Ellora I must also mention the construction of the new road from the Rauḍa town to the caves by the Public Works Department. The old *ghat* road above the caves was extremely steep at certain places and, as the abrupt curves had made it still more portentous, it has now been closed to vehicular traffic. The new road, although a little circuitous, is most welcome to visitors, who instead of walking down from the *bungalow*, can now drive with ease to the very entrance of the caves. The road was opened on the occasion of their Excellencies the Earl and Countess of Reading's visit to Ellora on the 6th December, 1925, having been constructed with special expedition through the personal interest of Nawab Ali Nawaz Jung Bahadur, Chief Engineer and Secretary to Government, Public Works Department.

Adverting to our work at Ajanta the progress made there is considerable, the principal measures carried out being:—

- (1) the cleaning and fixing of the frescoes in cave XVII,
- (2) the levelling of the fronts of several caves and the setting up of a pipe railing,
- (3) the construction of a metalled road from the Fardapur Bungalow to the caves and
- (4) the completion of the P.W.D. road from Aurangabad to Ajanta.

In the Report for the years 1931-33 F. (1921-1924) I have pointed out that the Italian *restaurateurs*, owing to the obvious limitation of the periods of their engagements, could devote their attention to the conservation of only the

¹ The building is described and illustrated in the *Journal of the Royal Asiatic Society* A.D.

² In the *Report* for 1921-24 it was mentioned that the conservation of the monument had been completed, but subsequently further measures have been found necessary which are being carried out.

important groups of the paintings, and that a vast amount of work relating to minor paintings remained to be carried out. This however is now being carefully executed by Mr. Ghulam Nabi, the Mechanic, who has been specially trained by us for the work. He has been of late engaged in treating the paintings of cave XVII, and it is gratifying to note that, during the year under report, he has completed the conservation of the entire series of pictures in that cave.

During the rains, landslips being not uncommon at Ajanta, pieces of rock block the fronts of the caves and often carry down the railings and parapet walls built by us. In the year under report we spent a sum of Rs. 8,854 in levelling and cleaning the fronts of several caves and in setting up a neat pipe railing in places where passage had become dangerous owing to landslips. A part of the above sum was also spent in completing the steps built for the new approach to the caves, to which I have already referred in the *Report* for the years 1321-33 F. (1921-24 A.C.).

The construction of the new road from the Fardāpūr Bungalow to the caves, alluded to in our *Report* for the previous year, is making good progress and, during the year under review, out of the total distance of three miles, one mile has been completed and of the remaining two miles also the earth work is finished. The visitors have now no more to drive over a rough hilly track but may motor right up to the caves.

The completion of the Aurangabad-Ajanta road marks another important step towards the improvement of the communication to the latter place. The visitor now, after doing his round at Ellora, has the option of proceeding by motor to Ajanta thus avoiding the somewhat unpleasant journey by railway, necessitating change of trains at several places. For the completion of this road as well we have to thank Nawab Ali Nawaz Jung Bahadur, who evinced deep interest in the expedition of the work.

Before concluding our account of the work carried out at Ajanta I must report for the information of our readers, the progress of our scheme regarding the reproduction of the frescoes by the Colour-Photography referred to in our *Report* for the previous year. Almost the whole of the year under review was spent in conducting an extensive correspondence with several expert firms in England and on the Continent, who required exact information on a large number of artistic and technical points, with a view to furnishing us with an approximate estimate of the total cost of the undertaking. Some firms ultimately submitted to us their estimates but they were tentative in the extreme and could be confirmed only after the examination of the frescoes by two or more experts of each firm. When we were at this stage Sir John Marshall, whom we have kept posted with all our efforts in this line, kindly informed us that an expert colour-photographer had been engaged by the Government of India in connection with the reproduction of the frescoes brought by Sir Aurel Stein from Central Asia, and the services of the same might be utilised by us by way of an experiment after the latter had finished Sir Aurel Stein's work at Delhi. The offer was most welcome to us and we are eagerly awaiting the arrival of the expert in order to make an experiment on a few of such frescoes as are in the

dark parts of the caves and the colours and outlines of which are also not very distinct. The experiment will enable us to judge with what success and at what expense the reproduction of the frescos can be effected.¹

Among the Moslem monuments in the Aurangabad District the tomb of Aurangzeb's wife, Rābi'a Daurānī occupies a preeminent position, although it suffers by comparison with its prototype, the magnificent Tāj. Through lack of proper supervision the building has suffered considerably in recent times and we have now asked the Public Works Department to prepare an estimate for the thorough repair of the monument. Owing to a continuous drought to which Aurangabad has been a victim during the last decade the beautiful gardens of this tomb have almost perished. An attempt is now being made to revive the gardens with the co-operation of Maulawi Abdul Haq Sahib, Principal, Aurangabad College, who has evinced a deep interest in this matter. Recently the Department advanced him a sum of Rs. 5,000 for the purchase of a Pumping Machine for the supply of water, which is the chief problem for the maintenance of the Gardens. The Department has also obtained him a recurring grant of Rupees 3,000 per annum for employing the requisite staff and the purchase of necessary implements.

Four drawings (Plates IX–XI) illustrating the architecture of this monument are published in the Departments' *Annual Report* for 1326 F. (1916–17 A.C.). The Report for the following year contains a photograph showing the façade of the building and the gardens in front (Plate I).

In the Oosmanabad District repairs are being executed to the Dhara-simha caves which having been used for dwelling purposes in recent times were in a most untidy condition. The interiors of the caves have been thoroughly cleaned up and square piers of ashlar masonry are being built wherever the rock above has decayed. Adequate measures are also being taken to prevent the accumulation of rain water in the caves which has been the main cause of the ruin of these monuments. The estimated cost for the complete conservation of the caves amounts to Rs. 9,160 of which Rs. 999 have been spent during the year under review.²

Another monument of which the conservation has been taken up in the Oosmanabad District during the year under review is the historic dam of the Naldrug Fort, built by Ibrāhīm 'Ādil Shāh II, in 1022 H. (1613 A.C.). The dam as well as the Pavilion, Panī ka Maḥall, are being carefully repaired and a sum of Rs. 1,324 has been spent on the work already done.³

In the Medak district the historic fort, of which a description is given at p. 2, of the *Annual Report* for 1327 F. (1917–18 A.C.), was conserved during the year under review, the expenditure involved being Rs. 2,554. The principle measures carried out comprise the laying out of a path from the foot of the hill to the citadel up to the point where a Mosque is built, the removal of rank

¹ The expert, Mr. E. Vasey, visited Ajanta in the beginning of March, 1920, and took photographs of four subjects, two of which are reproduced in plate I of this Report. The readers can judge for themselves the quantity of Mr. Vasey's work.

² A reference to the repairs of the caves is made in the Department's *Report* for 1914–15 A.D., p. 7.

³ For a description of the dam see the Department's *Annual Report* for 1914–15, p. 8.

vegetation from the walls and the gateways of the Fort and the repairs to the roofs of the latter.

Epigraphy

Owing to the curtailment of our tour programme it was not found possible to copy any new inscriptions during the year under report, but the material collected during previous years has been studied carefully and two monographs are now almost ready for publication—one on the Canarese inscriptions of Nagai, and the other on similar epigraphs from Patancheru. To Nagai, a reference is made in our *Annual Report* for 1325 F. wherein it is stated that the town was a provincial seat under the later Chalukyas, but the history of the place has been wrapped up in mystery which now is likely to be cleared to some extent by the publication of the inscriptions under study.¹ Patancheru seems to have been once an important centre of Jain worship for there is a vast array of the images of this religion in the town. Two inscriptions were discovered at the place some time ago and they are now being edited by Mr. T. T. Sharma.

In the field of Moslem epigraphy an inscription of Ghiyāthu'd Din Tughlaq dated 724 H. (1315 A.C.) was brought to my notice by the Epigraphical Superintendent of Southern India. The record, although found at Rajahmundry, throws considerable light on the conquest of Telingana by Ulugh Khān the illustrious son of Ghiyāthu'd Din Tughlaq. I am editing the inscription in the form of an article to be contributed to the next number of the *Epigraphia Indo-Moslemica*.

Numismatics

During the year under Report the Department has acquired 1,273 coins for the Museum Cabinet, of which 1,196 are Treasure Trove, 35 purchased, 16 presented and 26 received in exchange for our duplicates. The coins acquired as Treasure Trove consist of 42 gold, 467 silver and 687 copper issues. The coins which have been purchased and exchanged are all of gold and the presented coins are of silver.

Among the purchased gold coins is an unique *Mohur* of Jahandār of the Muḥammadabād (Bidar) Mint, which has not been published so far. There are some other rare *Mohurs* such as one of Aurangzeb of the mint of Nuṣratābād, another of Muḥammad Shāh of Aḥmadābād and another of Ḥaidar 'Alī of Bahādurpattan. Two gold coins of the last named mint are at the British Museum and they have been ascribed by Lane-Poole to Shāh 'Ālam II. But the initial letter ح of Ḥaidar 'Alī's name occurs on the reverse and as it was customary at that time to issue coins under the name of the Delhi Emperor with only the initial letter of the vassal chief marked on the coin there remains no doubt that the coin was issued by Ḥaidar 'Alī. It may be interesting to note that Faṭḥ Bahādur was another appellation of Ḥaidar 'Alī and the mint name Bahadur Pattan was perhaps given by him to some old town of his dominions after that appellation. Near Kopbal in H.E.H. the Nizam's Dominions we have a fort called Bahādur Banda which bears an inscription mentioning the fact—

“Faṭḥ Bahadur Nawab was the Lord of this Fort,
From whose loins descended Tipu Sultan, an offspring illustrious as the sun.”²

¹ Mr. Streenivas has described the antiquities of Nagai, in an article contributed to the *Journal* of the Hyderabad Archaeological Society for 1919-20.

² Cf. *Journal* of the Hyderabad Archaeological Society for January, 1919, p. 98.

Mr. Streenivas has written short notes on the Bahadurpattan as well as on other rare coins which are published with Appendix A of this *Report*.

Among the gold coins acquired by exchange are a variety of South Indian pagodas—comprising a rare Sinhalese *Jayabahū* or *Vijayabahū* fanam, a number of Mysore pagodas and fanams of Tipu and other kings of that Province. Tipū's gold coins are a welcome addition to our Cabinet as till now we had only some copper and very few silver coins of his.

The silver coins received as Treasure Trove consist of those of the Mughal Emperors from *Shāh Jahān* downwards and a large number of old Halli and *Chainī* rupees. Some of these are quite rare, for example the Aurangzeb's rupees of *Murāzzamabād* (Gorakhpur) and *Makhsūsabād* (old *Murshidabād*) mints, *Shāh 'Ālam I* and *Shāh 'Ālam II*'s rupees of *Firozgarh* (*Yādgīr*) and *Shāh 'Ālam I*, *Farrukhsiyar*, *Muhammad Shah*, *'Ālamigīr II* and *Shāh 'Ālam II*'s rupees of *Firoznagar*. The last two mints although identified with the help of contemporary records by Prof. Hodivala and the late Mr. Irvine respectively yet, on account of the scarcity of their issues, considerable doubt has prevailed regarding the identifications made by these scholars. A coin of *Firoznagar* of the reign of *Muhammad Shāh* was acquired by us as Treasure Trove in 1326 F. (1910-17 A.C.) and it is noticed in our *Report* for that year (*vide* p. 41). Since then we have found as many as 46 coins of this mint and also come across a description of the Sarkar of *Firoznagar*, in a contemporary *Statistical Account* (MS.) which mentions the popular name *Raichur* side by side with *Firoznagar*. Mr. Streenivas has studied the legends on *Firoznagar* coins in a separate note published with Appendix A. Of the mint of *Firozgarh* hitherto only four coins (two gold and two silver) of *Shāh 'Ālam I* and *Farrukhsiyar* were known. The five silver coins now acquired by us relate to the reign of *Shāh 'Ālam I*, *Shāh 'Ālam II* and are perhaps the only other known coins of the mint. Mr. Streenivas has noticed these coins as well in his *Notes*. Independent of Mr. Hodivala's identification of this mint with *Yādgīr*, I have found a description of the place in the MS. *Statistical Account* mentioned above, wherein the name *Firozgarh* occurs along with the old name *Aitgir-Yadgir*.

In the Report for the year 1331-33 F. (1921-24 A.C.) I referred to the sub-Museum mission of a modified scheme for the organisation of a Museum in Hyderabad the need of which has been graciously confirmed by a Firman of His Exalted Highness issued as early as 1914. The Government in their review of the above *Report* were pleased to observe that the modified scheme when submitted will be considered favourably. The said scheme has been submitted to Government and as it involves an annual expenditure of Rs. 20,000 only, I hope the Government will kindly sanction the establishment of the Museum at least as an experimental measure for five years to judge of its probable utility and educative value to the general public.

It is gratifying to note that the Hyderabad Archaeological Society has been revived under the able Presidentship of the Hon'ble Mr. W. P. Barton, C.S.I., C.I.E., the Resident in Hyderabad and, during the year under review, two meetings were held. The success of the institution to a very great extent

depends upon the active help of the members, which I hope will be forthcoming, particularly when we consider that we have so many touring officials in the Dominions and also such a large number of brilliant scholars at the Nizam College and the Osmania University. In all progressive countries Archæological research is conducted more by private effort than by the State-created departments and here the need for such an effort is all the more apparent, when we know that the field is enormously rich and not likely to be exhausted by the researches of one or two State officials.

Publications

The publications issued by the Department during the year are :—

- (1) *Annual Report*, 1331-33 F. (1921-24 A.C.),
- (2) The Kotagiri Plates of the Reign of the Kakatiya Queen Rudramāmba, being *Monograph No. 6* of the Hyderabad Archæological Series,
- (3) Bodhan stone Inscription of the Reign of Trilokyamalla being *Monograph No. 7* of the Hyderabad Archæological Series and
- (4) *Guide to Ajanta Frescoes*.

The last publication, although compiled in connection with the Viceregal visit, has been so much appreciated by the public that all the copies printed are sold out now and a second edition of it is now in the press. To enhance the utility of the book four colour and two monotone illustrations will be included in the next edition. The Department is also planning to issue a revised edition of the late Dr. Burgess' *Guide to Ellora*, the salient feature of which will be a considerable number of illustrative plates which were not included in the first edition.

In addition to the above, I have edited, during the year under review, Fasciculus 3 of the second volume of the *Shāhjahān Nāmāh* for the Bibliotheca-Indica series of the Asiatic Society of Bengal and also contributed three articles on the inscriptions of the N.-W. Frontier Province, Rajputana and the Deccan to the *Epigraphia Indo-Moslemica*. The latter work has been done in my capacity as Epigraphist to the Government of India for Persian and Arabic Inscriptions.

Library

One hundred and thirty-four new volumes were added to the Library of the Department, of which eighty-nine were purchased and the rest received as presentation copies from various institutions and Governments or obtained in exchange for the Department's own publications. The price of books has increased considerably since the war, and, as those required by the Department are generally very expensive owing to illustrative plates, our annual grant of O.S. Rs. 500 fixed in pre-war times has become quite inadequate and we shall request the Government to kindly raise it to Rs. 1,000. Archæology is a progressive science and in order to discharge our duties efficiently it is imperative that we should keep ourselves abreast of the subject. Our demand for O.S. Rs. 1,000 is quite modest for the actual expenditure on the purchase of books during the last three years has been :—

Year				Amount		
				Rs.	As.	P.
1332 F.	(1922-23 A.C.)	1192	4	4
1333 F.	(1923-24 A.C.)	954	0	0
1334 F.	(1924-25 A.C.)	1,351	10	4

The expenditure beyond our grant during these years we have been able to manage through savings from other heads, but in view of the gradual expansion of our work it may not be possible to do that in future and therefore an increase in the annual grant for books is an absolute necessity.

During the year under review one hundred and nine new photographs have **Photographs** been taken of which forty-four relate to Ajanta and Ellora. The demand for the views of the latter two places is so great that with our present staff we are finding it difficult to comply with the request of the public in this respect, particularly when the requirements of each order vary so much in the matter of technical detail. For the benefit of the ordinary student, however, we are arranging to get a series of choice views printed in post-card size. These reproductions will be of a superior quality and, when offered at a small price, it is likely that the demand for original photographs will considerably decrease, but the number of *savants* and experts visiting Ajanta and Ellora is increasing rapidly every year and we have to see whether even after the printing of post-card views it will be possible for us to cope with the work, or ask the Government for the appointment of an Assistant Photographer. Again the initial cost on the printing of the post-card views although not rising to a huge sum, yet will be considerable in view of the slender resources of the Department and we shall have to approach the Finance Department for the advance of a suitable sum which may be gradually recouped by the sale of the post-cards.

The series now in the press comprise four colour reproductions and forty-four monotonies, and will be ready for sale by the beginning of the next cold weather (November, 1926). The work is being done by the Oxford University Press whose skill in this special line has been amply demonstrated by the exquisite post-cards published by the British Museum.

Mr. Sultan Ali Faruqi has prepared five large architectural drawings **Drawings** during the year under review—three of them relate to Baihmanī, 'Ādil Shāhī and Mughal monuments of Gulbarga and the remaining two to a pair of Qutb Shāhī buildings at Golconda. The titles and scales of these drawings are given in Appendix G. In addition to the above, Mr. Syed Ahmad has copied in full scale the complete outline of the *Visvantra Jataka*, painted on the entire wall of the left corridor of cave XVII at Ajanta. The picture shows several episodes in the life of the generous Prince Visvantra and in each the figure of the Brahman Jujaka, who has no scruple in asking the gift of the dearest things from the Prince, is painted with consummate skill; his cringing attitude combined with a villainous expression of face makes him an embodiment of the Devil himself. Mr. Syed Ahmad's copy, which covers five large sheets, reproduces the vigour and beauty of the original drawing with great fidelity. An episode

from this *Jataka*, based on Mr. Syed Ahmad's copy is included in the post-card series now in the press at Oxford.

**Expenditure
on Conserva-
tion**

The total expenditure on the conservation of the monuments amounted to O. S. Rs. 46,971 which included the emoluments of the staff employed for the up-keep of certain important buildings and antiquities. The above sum is much nearer the normal expenditure of Rs. 50,000 fixed by the Finance Department for the annual repairs of the monuments of the Dominions, than the figures for the previous year that is Rs. 29,225. The rise during the year under review is mainly due to the growing interest of the officers of the Public Works Department in our work, and I thank them cordially for it. The details of the expenditure are given in Appendix D.

**Expenditure
on the Main-
tenance of the
Department**

During the year under report a sum of Rs. 41,339-10-7, as opposed to Rs. 39,519-13-4 in the previous year, was spent on the maintenance of the Department. The slight difference being due partly to the increase in the salaries of the staff according to the time-scale but mainly to the purchase of a larger number of books and antiquities than in the previous year.

**Programme
for 1335 F.
(1925-26)**

The programme for 1335 F. (1925-26), as already submitted to Government (*Vide* letter No. 74 dated 24th Ādhur, 35 F.—29th October, 1925), embraces tours in the Gulbarga, Warangal, Aurangabad and Bidar Districts. The object of my visit to the first place is that a local institution styled the Anjuman Iṣlāḥī Musalmānān, Gulbarga, has lately evinced great interest in the study and conservation of the monuments there, and has asked for my help in several matters requiring demonstration on the spot. I have also been asked by Sir John Marshall to furnish him with notes on the salient features of the Baihmani monuments of Gulbarga in connection with his chapter on the Musalman monuments of India before the advent of the Mughals for the *Cambridge History of India*.

A tour in the Aurangabad District is also indispensable owing to the prospective visit to Ajanta of Mr. Vasey, the Colour Photographer, as also owing to the importance of the conservation work in progress at Ellora. During my sojourn in the above District I intend to pay a flying visit to Paithan the Pratisthan of the ancients. It is one of the oldest cities in the Deccan, and excavation conducted at proper sites may result in useful discoveries. Both in Warangal and Bidar conservation work has been carried out on an extensive scale during the time when I was away in Europe and, as it relates to important buildings, inspection of them is absolutely necessary.

My Assistant Mr. T. Streenivas is contemplating a detailed tour in the Mahbūbnagar District, which is more or less a *terra-incognita* to the antiquarian up to now and where interesting discoveries are likely to be made.

G. YAZDANI,
Director of Archæology,
H.E.H. the Nizam's Dominions.

7th Amurdad, 1335 F.

APPENDICES

APPENDIX A

Notes on coins in the Cabinet of the Hyderabad Museum.

By T. STREENIVAS.

The total number of coins received for the Cabinet of the Hyderabad Museum, between 1st April 1924 and 5th October 1925, is 1,591. The sources of acquisition and the metal of the coins are shown in the following table :—

How acquired				METAL			Total
				Gold	Silver	Copper or other metal	
As Treasure Trove	42 (including 2 gold bits).	669	687	1,398
Purchased	134	134
Presented	6	17	9	32
Exchanged	27	27
TOTAL				209	686	696	1,591

The gold coins acquired included :—

22 Early South Indian Spherules,

128 Vijayanagar coins, 1 of which was of Hari Hara II (1374-1406), 5 were of Deva Raya II (1422-27), 101 of Krishna Deva Raya (1509-30) and 21 of Achyuta Raya (1530-42),

15 Mughal coins of which 5 belonged to Aurangzeb, 1 to Jahāndar, 2 to Farrukhsiyar, 4 to Muḥammad Shāh, 3 to Muḥammad Akbar II and 1 to Shāh 'Alam II. One of these, a Mohur of the Muḥammadabad (Bidar) Mint, belonging to Jahāndar is quite a novelty. Short notes about this and a Mohur of Aurangzeb of Nuṣratabad Mint and another of Shāh 'Alam II of Bahadurpatan are appended below.

The gold coins received as presents from the Government Museum, Madras, included 1 Star Pagoda of the E.I. Co., 4 varieties of old South Indian Fanams and 1 Fanam of Gourshah.

Of those exchanged, one was a Padmatanka of Sri Rama from the Government Museum, Madras, for one of Krishna sent in return to that institution. This exchange has made the representation of the Padmatankas of the Yadava Kings of Devagiri, fairly complete. The others included 1 each of "Sri Venkatesvara Namah" pagoda, half-pagoda, South Indian Varaha—Chalukyan Type, Sinhalese Lankesvara coins of Jayabahu or Vijiabahu considered to be extremely rare, Mysore Pagoda of Sri Krishna Raya, Mysore fanam of Haidar, Mysore pagoda of Tipū of Nagar and Patan Mints, Tipū fanams of Calicut and Perok mints, Mysore fanams of Narasimha and of Sadasiva, Travancore fanam, E.I. Co.'s Half Mohur of the Murshidabad mint, Star Pagoda, Star single and double Pagodas, Queen Victoria Mohur, E.I. Co.'s Port Novo Pagoda, Victoria's Lion and palm tree Mohur, East India Co.'s Pagoda and King George V, "15 rupees" 1918.

Among the silver coins received as Treasure Trove there was a small find of 25 from Mauza Rāhatgaon, Patan Taluq, Aurangabad District, everyone of which belonged to Shāh Jahān; 12 of these were of the Surat mint, 8 of Daulatabad and 1 of Junagadh; the mint was cut on the remaining 4.

Another find of 70 silver from Mauza Dhanuri, Gulbarga District, was composed of 69 coins of Aurangzeb representing the mints: Ahmadabad, Ahmadnagar, Aurangabad, Haidarabad (Dāru'l Jihād), Junagadh, Surat, Khujistabun'yād, Shāhjahānabād, Sholapur, Kambayat, Golconda,

and Murazzamabād (see short notes below) and curiously enough with these 69 there was one solitary Hali Rupee of His late Highness with the initial م! One wonders how this comes to be in the company of Aurangzeb's rupees. A third small find of 22 silver contained two rupees of Shāh Jahān and the rest of Aurangzeb representing the following mints:—Akbar-nagar, Patna, Jahāngīr-nagar, Khujistabunyād, Surat, Shāhjahānabād, Katak, Kambayat, Lahor, Makhsūsābād (see short notes below) and Nuṣratābād. Another find of 201 consisted solely of old Hali Siccās: 46 of these were of Sikandar Jāh with the initial س, 131 of Nāṣiru'd Daulah with ن, 4 of Afzālu'd-Daulah with ا and one of the late Nizam with م, the dates ranging from 1226 to 1309 H.

The other finds were mostly of the later Mughals and Chalnies, but a rupee of Shāh 'Ālam II of Firozgadh mint was quite unique (see short notes below).

The copper coins do not call for any particular notice.

The following table shows the districts in the Dominions which have contributed coins under Treasure Trove with the number and metal of the coins:—

District	METAL			Total
	Gold	Silver	Copper or other metal	
Aurangabad	4	25	„	29
Gulbarga	18	70	„	88
Karimnagar	„	22	„	22
Mahbubnagar	20 (including 2 gold bits).	64	587	671
Nizamabad	„	11	„	11
Osmanabad	„	80	„	80
Parbhani	„	202	100	302
Raichur	„	195	„	195
TOTAL	42	669	687	1,398

SOME RARE COINS.

Ahmadabād.

Gold coins of the later Mughals of Ahmadabād are very rare. Mr. Whitehead mentions the finding of Muḥammad Shāh's gold coin of this mint among the old coins in Bahawalpur State Toshakhana (N.S., XI, 69); but there is none in the Indian Museums except the following which was recently acquired by the Hyderabad Museum:—

Obverse.	Reverse.
<p>A/ محمد شاه</p> <p>بادشاه غازي</p> <p>سکه مبارک</p>	<p>مانوس</p> <p>میمنت</p> <p>سنه ۱۶ جلوس</p> <p>ضرب</p> <p>احمد اباد</p>

(See Pl. VII, 1)

Bahadurpatan.

There are two gold coins of Shāh 'Ālam II, of this unknown mint in the British Museum of the years 1119 X-14 and 1197-20. Lane-Poole says: "Bahadurpatan may be Bahadurgarh which is frequently mentioned in the wars of the time of Shah Alam. The presence of ح on the reverse which is usually associated with Haidar Ali of Mysore would suggest that the mint town may be somewhere in South India which came under that Sultan's sway."

The following is another recent acquisition :—

Obverse.	Reverse.
<p>A' (ح) می دین شا <hr/> فضل شاه عالم <hr/> </p>	<p>مانوس میمنت سنه ۱۵۰۵ ح جلوس <hr/> ضرر بهادر پٹن (See Pl. VII, 2)</p>

Muhammadabad—Bidar.

A mohur of Aurangzeb (No. 1501) and one of *Shāh 'Ālam* I (No. 2001) in the Punjab Museum, a mohur of *Shāh 'Ālam* I found by Mr. Whitehead among the coins in the Bahwalpur State *Toshakhana* (N.S., XI. 69), a rupee of *Shāh 'Ālam* I, noticed by Mr. Whitehead in N.S., XV. 89, and two copper coins (Nos. 5245 and 5246) in the Lucknow Museum about which Mr. C. J. Brown says in a foot-note, "probably Banaras, but the name has not been read on the coins." are all the coins from this mint so far published. So this mohur of *Jahāndar* is a novelty :—

Obverse.	Reverse.
<p>A' شاه <hr/> صاحب قران جهاندا ... <hr/> و برز چو ...</p>	<p>محمد اباد <hr/> ضرر سنه احد جاوس میمنت (مانوس) (See Pl. VII, 3)</p>

Nuṣratabād—Sukur.

Mr. Whitehead published (N.S., XV, 89) a gold coin of Aurangzeb struck at *Nuṣratabād* or *Sukur* in the Dominions which was a novelty. This is another of the same mint of that Emperor :—

Obverse.	Reverse.
<p>A' عالم گیر اورنگ زیب <hr/> چو مهر منیر <hr/> دو جهان</p>	<p>مانوس میمنت سنه ۴۸۰۸ جلوس ۱ ... <hr/> ضرر (ذ) صرت (See Pl. VII, 4)</p>

Fīrozgarh—Yadgir.

Mr. Whitehead in the P.M.C., p. xci, says that *Fīrozgarh* was a fort in the Province of Bidar, west of Haidarabad. Subsequently Professor S. H. Hodivala identified *Fīrozgarh* with *Yādگیر*, now in the Gulbarga District, in his learned article in N.S., XXVIII, 182. The following particulars very kindly furnished by Mr. Yazdani, from the Manuscript Statistical account of the Deccan in the library of the Hyderabad Archaeological Department, are of interest in this connection :—

"(Pargannah) *Fīrozgarh 'urf* Etgir, contains 64 villages yielding a revenue of Rs. 1,34,947-1-9, and has a small hill fort which is like a *haveli* (palace); has several gates and 770

steps. A well-populated town nestles at the foot of the fort. It has also a moat. Close to the town is a market place which has a large area and fine locality. Formerly it was known as Ibrāhīngarh. When Khān Fīroz Jāng Bahādur conquered it in the 30th year of Aurangzeb's reign it was called Fīrozgarh. Its boundaries are: on the east the mahāls of Muẓaffarnagar (Malkhed), on the north the same mahāls, on the West Gulbarga and on the south the forest of Subah Bijapur. It has a hill fort. The river Bhimra passing through the sircars of Naldurg and Gulbarga enters this sircar and coming up to a distance of a *kiroh* (about 2 miles) from the fort, flows southward and touching several mahāls of Muẓaffarnagar goes towards the forest of Bijapur and flowing further south joins the river Kistna near the sircar of Raichur. From Fīrozgarh the distance to Hyderabad is 50 *kiroh*, Bijapur 50, Bidar 50, Adoni 50, Malkhed 12 and Gulbarga 20."

The only known coins till now from this mint are a mohur and two rupees of Shāh 'Ālam I and a Mohur of Farrukhsīyar published by Mr. C. J. Brown in N.S., XXII, 130.

There are now in the Hyderabad Museum three coins of Shāh 'Ālam I of this mint of the years 1121-3, 1122-4 and 1123-4 respectively. The second of these has the mint in full and is shown in Pl. VII, 5.

In addition to these there are two more rupees of Shāh 'Ālam II not hitherto published. One of these is—

Obverse.	Reverse.
<p>شاه عالم بادشاه غازی سنه ۱۱۲۳ مبارک</p>	<p>مانوس میمنت سنه جلوس فرز گده</p>

(See Pl. VII, 6)

Fīroznagar—Raichur.

Mr. William Irvine identified Fīroznagar with *Raichur* (N.S., XIV, 87), quoting two references from the M'asir-i-'Ālamgīrī. Mr. Yazdani has furnished me with the following reference to Fīroznagar from the MS. Statistical account already mentioned:—

(Sircar) Fīroznagar 'urf Raichur, contains 9 mahāls yielding a revenue of Rs. 13,26,455-4-0. They are: (1) The town itself, (2) Kotal, (3) Mosik(g?)al, (4) Hiladena, (5) Baihnoo, (6) Halihal, (7) Varur [in mauza Gadwal is a flourishing pant (market). There is a Zamindar], (8) Amsej—mauza Paknur known as Dilawarnagar, situated on the river Kistna: seat of Government, and (9) Alpur—same note as against No. 8, above.

Fīroznagar finds a place in the list of forts included in the Subah of Bijapur.

In Whitehead's list of Mughal mints are shown a rupee of Shāh 'Ālam I and one of Shāh 'Ālam II in the British Museum and a third one of Muḥammad Shāh in the White King collection. None of the Indian Museums has a coin of this mint. Raichur being in the Dominions, it is only natural that I have so far found not less than 46 coins of this mint among the Treasure Trove acquired for the Hyderabad Museum. They include 12 rupees of Shāh 'Ālam I, one of Farrukhsīyar, 27 of Muḥammad Shāh, two of 'Ālamgīr II, and four of Shāh 'Ālam II.

Two coins of Shāh 'Ālam I bear the years 1122-4, one the years 1122-5, and nine the years 1123-5.

The single coin of Farrukhsīyar has the years 1128-5.

The dates on Muḥammad Shāh's coins range from the 9th regnal year to the 30th.

One of the two coins of 'Ālamgīr II has 1168-1 and the other only ۱۱۶۸.

The four coins of Shāh 'Ālam II show ۱۲ and ۱۳.

Some of the typical coins among these are described below.—

Fīroznagar—Raichur.

Shāh 'Ālam I.

Obverse.
R

عالم به ۱۱۲۳
سکه مبارک

Reverse.

مانوس

(See Pl. VII, 8)

Muḥammad Shāh.

Obverse.
R
۱۱۴ محمد شاه
باد غازی
مبار
سکه ک

Reverse.

مانوس
میمنت
سنه جلوس
ضرر
فروز نگر

(See Pl. VII, 9)

N.B.—The disposition of the words سکه مبارک on the obverse of these coins is very peculiar.

I would like to draw the particular attention of numismatists to the three following coins of Muḥammad Shāh of this mint:—

R (1) Obverse.
۱۱۰ محمد شاه
باد غازی
مبار
سکه ک

Reverse.

مانوس
میمنت
سنه ۳۰ جلوس
ضرر
فروز نگر

(See Pl. VII, 10)

R (2) Obverse.
do.
but punch mark
before محمد

Reverse.

do.

(See Pl. VII, 11)

On No. 1, on the obverse, before the first two figures 11 of the Hijri year are clear and on No. 2, there is a punch mark just where the Hijri year must have been. But the strange part of it is that on the reverse of both these coins we find the usual legend—

مانوس
میمنت
سنه جلوس
ضرر
فروز نگر

together with another جلوس in small characters and the figures ۳۰ over سنه.

(3) Obverse.

Reverse.

۶۱۱ محمد شاه
هجري
باد غازي
مبار

do.
سنه obliterated

(See Pl. VII, 12)

On the reverse of this coin it is not possible to say, on account of the many punch marks, whether a second جلوس and any regnal year like the above two had originally been inscribed. But on the obverse before محمد on the top line there are some characters, unfortunately made indistinct by a punch mark, which I venture to take to be what is left of the original word هجري and ۱۱۶ ×. It will be interesting to know if the word هجري and the Hijri year in figures had been met with on any other coin.

‘*Ālamgīr II.*

فروز نگر

(See Pl. VII, 14)

Makhṣuṣābād—Murshidabad.

Aurangzeb.

Aurangzeb's coins with the old name *Makhṣuṣābād* are rare and they occur only on coins of ۱۱۱۵ and ۱۱۱۶. No. ۱۴۶۶ in the Indian Museum is of ۱۱۱۵-۴۸, No. ۱۸۹۹ in the Punjab Museum is of ۱۱۱۶-۴۹, while No. ۳۳۳۷ in the Lucknow Museum is of ۱۱۱۵-۴۸. This in the Hyderabad Museum is of ۱۱۱۶-۴۸ :—

Obverse.	Reverse.
<p>Æ</p> <p>عالم گیر اورنگ زیب</p> <hr/> <p>... بدر منیر</p>	<p>میمنت سنه ۴۸ جلوس</p> <hr/> <p>مخصوص آباد</p> <p>(See Pl. VII, 15)</p>

Mu'azzamabād—Gorakhpur.

This is a very rare mint. Mr. Whitehead in the P.M.C. says that gold coins of this mint are commoner than those in silver. The Punjab Museum has one copper coin of Akbar, one mohur of Farrukhsiyar and two mohurs of Muhammad Shāh. Whitehead's list of Mughal mint towns shows a rupee of Aurangzeb in the White King collection. This of that Emperor in the Hyderabad Museum is of 1097-29:—

Obverse.	Reverse.
<p>Æ</p> <p>عالم گیر اورنگ زیب</p> <hr/> <p>ز چو بدر منیر در جهان</p>	<p>جلوس میمنت مانوس معظم سنه ۲۹ آباد</p> <p>(See Pl. VII, 16)</p>

Unassigned or doubtful.

Obverse.	Reverse.
<p>(1) A¹</p> <p>Seated goddess (Lakshmi ?)</p>	<p>Blank</p> <p>(See Pl. VII, 17)</p>
Obverse.	Reverse.
<p>(2) Æ</p> <p>ع ۸۴ لم ۱۱ گیر</p> <hr/> <p>بادشاه غازی</p> <hr/> <p>... سکه ...</p>	<p>جلوس میمنت مانوس سنه ۱۶ حکبا</p> <hr/> <p>پور؟</p>

Another of 11(?)85-17

(See Pl. VII, 18-19)

There are six of these coins. One is of 11(?)83-15, four of 11(?)84-16, and one of 11(?)85-17.

¹ My friend Mr. R. Srinivasa Raghava Ayyangar, of the Madras Museum, thinks that this is of the Vijianagar kings or of some chiefs subordinate to them.

APPENDIX B

The diary of the Director for the year 1334 F. (1924-25 A.C.)

Month	Date	Place
1924 A.C. (1334 F.)		
October to November.. (<i>Ādhur to Dai</i>)	6th-16th (1st-12th)	.. Duty at headquarters.
..	17th-18th (13th-14th)	.. Hyderabad to Aurangabad.
..	19th (15th)	.. Aurangabad to Ellora and back.
..	20th (16th)	.. Halt at Aurangabad.
